

PRESENTATION ADVANTAGE®

Communication Advantage Series

PARTICIPANT FEEDBACK

I'm not sure how it could have gone better. The subject matter expert (theory and example), developed a great rapport with the team, and best of all: every theory taught was immediately applicable and brought into practice. I think this might make a material difference in some of our portfolio companies.

By far this was the BEST FranklinCovey solution we've taught! Several in the audience had participated in other FranklinCovey solutions. A HUGE kudos to your delivery and the content. This resonated so well because it is an individual skill-set and they have maintained great accountability in applying the skills internally.

This class was very helpful for me to understand the structure of how to provide a presentation. Presentation Advantage is a fantastic course in communication!

The price of being ill-prepared to present your thoughts or ideas could be the loss of big promotion, that key deal, or your relationship with a valued customer. The skills and practice that I experienced in *Presentation Advantage* gave me the structure and confidence that I can immediately apply to deliver my message with greater clarity, purpose and vitality. No regrets!

This work session was outstanding! From the power of the content, to the skill development exercises, to the practical tools. I would recommend this workshop to everyone who wants to significantly enhance their presentations. I left feeling more confident, more skilled, and more excited about making presentations than ever before. In short, I feel that I now truly have a "Presentation Advantage".

After the first 90 minutes, I looked at the time and thought, "This has already been worth the price." There was so much more I learned after that, which was a bonus!

Seeing myself present on video helped me start the improvements I need to be a more successful communicator.

It was a great blend of learning how to prepare a communication and also how to present it. I find both to be VERY VALUABLE SKILLS!

"Winging it" isn't going to cut it anymore. I needed this course.
